WORK EXPERIENCE

Web Developer

Freelance 2024- Current

- Executed a full-scale migration of a React JSX codebase to TypeScript, creating standardized type definitions for all API responses and component props.
- Abstracted React Hook Form configuration into a shared custom hook across a three-step SaaS onboarding flow, centralising validation logic, dirty state tracking and error handling to eliminate duplicated resolver setup across steps.
- Configured a GitHub Actions pipeline triggering on PRs and main branch merges, running Jest test suites and production builds before deploying to AWS, ensuring no untested code reached production.

Front end Developer

Giraffe360 2022- 2024

- Developed and delivered a Gaussian blur editor inside a Nextjs project, using Canvas API. Communicated with the back end team on a daily basis.
- Collaborated with cross-functional teams following SCRUM methodology, using Jira. Translated Figma design mockups into responsive web pages, and ensured optimal performance and usability.
- Effectively employed Jest's mock functions and modules to isolate dependencies, enabling efficient unit testing and reducing test setup complexity.

Web Developer

RevPanda Agency 2020-2022

- Successfully developed and launched WordPress affiliate website that attracted significant attention, resulting in its acquisition for 4 million USD within just 2 years.
- Designed and developed a new agency website on ReactJS based on Figma design, resulting in a 50% boost in Lead Generation compared to the previous website.
- Ensured outstanding performance with 90+ Core Web Vitals and perfect Lighthouse scores, delivering exceptional user experiences and optimal page loading times.
